
Remover 8000

Product Type

Plaster Water washable paint and varnish remover, is a first quality stripper which will remove all types of cellulose, air drying, stoving synthetic enamels as well as all types of dried water based paints. The remover is efficient, yet economical in use and non-flammable. However, it requires the surface to be rinsed or hosed down with water after stripping, and thoroughly dried before the repainting schedule is commended.

Usage Instruction

Surface

Thoroughly wash off all traces of the paint remover from the surface with clean water after stripping and allow for full dryness before repainting.

Packaging

1 Kg
1 Us Gallon
1 Drum

Method Of Application

It is specific for brushing application, apply the softening liberally with an old paint brush giving it all the time that it needs in order to take place before attempting to remove the old paint.
