#### **Technical Data**

Colors: White ready - mix color  
(refer to catalogue)

Finish: Matt

Drying Time: 1/2 hour

To touch: 2 hours

Curing: Physical Evaporation

Full Hardness: one week

Thinning: 25% water 1st coat and 1l. 2nd coat

Clean up solvent: Water and Soap

Practical Coverage: 25-30m<sup>2</sup> / 1 US Barril.

Depending on surface porosity,  
method of application and texture requirement

Packaging: Available in 1 US Barril

## **Usage Instruction**

### **Pretreatment:**

#### **New Surfaces**

Before usage, clear all surfaces from grease, oil, dirt and foreign matters which could prevent proper adhesion.

#### **Application**

Dilute for the 25% for the 1st coat by water. Allow overnight drying. If necessary, apply final coat which is diluted in water only.

Use large medium or fine pore foam roller for application.

#### **Precaution:**

- 1- Do not apply paint if air or surfaces temperature is below 10°C.
- 2- Employ several applicators for large walls, and stop the work only when the application is completed to avoid mistakes.
- 3- Avoid when the walls are exposed to the sunbeams in summer
