

Epoxy Finish Coat 4903

Product Type

Plastoxy Epoxy is composed of 2 components, resin and a hardner, which need to be thoroughly mixed together in the proportion immediately before application.

Areas Of use

Plastoxy epoxy may be used on new concrete which is 28 days old that has an open clean surface texture. Best Used in store indoors.

Usage Instruction

Surface

The concrete surface must be dry, cleaned and cleared from any particles. Do not apply over hardened primer or old epoxy without proper surface preparation.

Precautions

- Avoid application at air and floor temperatures below 10°C
- Use in well ventilated area
- Keep away from sparks and open flames
- It may cause irritation. Avoid contact with eyes and skin.

Application

Apply by brush, short haired lamb wool, roller, industrial sprayer; or squeege, ensuring surfaces are fully covered. Apply second coat at right angles to the first coat within an interval of maximum 24 hours. Pay particular attention to edge and joint details.
